PROJECTS

Galaxy Product (01/2025 - 04/2025)

- Developed an end-to-end Sales Tracking Application to monitor daily salesperson activities, including check-in/check-out, push notifications, real-time location tracking, customer creation, order management, beat planning, and a notes module. Enhanced functionalities and optimized performance based on evolving business needs.

Vista Saas (09/2024 - 12/2024)

- In this project, I have fixed its bugs and ensured its flow runs perfectly. I added a new functionality for Items selections and dynamic fields, where form fields can be added from the backend and are displayed and function correctly on the mobile end.

Elesco (05/2025 - 06/2025)

- Developed a Dealer Management App from scratch, featuring stock management, inventory sharing between dealers and sub-leaders, and a stock audit module with image attachments for accurate verification and improved tracking.

MojoCaller Booking / Tracking App (01/2024 - 08/2024)

- This application is a platform for monitoring booking status, including driver and customer status, feedbacks, invoices, cancellation , tracking and more.

Book Airport Cab (01/2024 - 08/2024)

- This application allowed airline passengers to book cabs between their homes and the airport , I Worked on api integration , New features add / Updates.

ACHIEVEMENTS

Gold Medalist in Graduation(BCA)

Java (Basics) Certified From HackerRank

Android App Development Certified From NeatRoots
(04/2023 - 07/2023)
